

COVID-19 CASES IN COMMUNITY

Monday August 16, 2021

There are multiple confirmed Covid-19 cases now in community. We are communicating that if you or your children attended the family centre anytime between Monday August 9-Thursday August 12, that you may have been exposed to Covid-19. This is not an official notification of exposure or direction to self isolate as Interior Health or First Nations Health are the authorities to make those individual calls to close contacts, however, protecting the health of our community is our top priority and we feel it is necessary to release this statement. Contact tracing takes time and in order to protect yourselves and your family members, please take all precautions to monitor for symptoms closely. It is your choice to self isolate as we await more information, but anyone contacted directly by Interior Health or First Nations Health Authority as a confirmed close contact must follow their instructions to self isolate.

Thank you and stay safe everyone.
