

Refurbishing

We would like to have some feedback from the community in regards to the Pergola.

This Pergola was built in honour of the Residential School Survivors. We are looking into refurbishing the wood to coincide with the new Pavillion that was built this year. Any of the wood that will need replacing will be donated by T.L. Timber, they had donated the timber for the existing structure.

What we would like to hear back from the community is:

- Do we keep it the same?
- Are there any changes that should be made?
